

Appendix 5.1: Data Lifecycle

There are multiple versions of the data lifecycle available however, we categorize the different elements of into four primary buckets

Data Lifecycle Stage	Description	Section
Data Inception	Includes (i) how and what data gets collected, (ii) how it's checked for quality, and (iii) how it's captured depending on the nature and type of data	(i) Section 3 & Section 5 (ii) Section 3 (iii) Section 1
Data Storage	Includes (i) how data is secured and protected, (ii) how and who gets access to it	(i) Section 3 (ii) Section 1&3.
Data Use	Includes (i) use, and (ii) sharing	(i) Section 3 (ii) Section 1,3, 4 & 5
Data Disposal	This marks the end of data lifecycle and includes data archival and secure destruction/deletion	Section 3
